Hello City Council,

I am sure you are aware of the allegations of election rigging being perpetrated by city employees including Chief Rolle, Alexander Gretsas and the City attorney(s).

If any of the allegations have substance it is incumbent upon you to make sure your employees are not violating election law and/or fair labor practices. You will not receive any cover if you refuse to take appropriate corrective action.

This email is to make sure you are aware of these allegations. You no longer have any plausible deniability. Here is a link to a post I made earlier exposing these allegations:

https://www.facebook.com/TrueHomestead/posts/1134551030063387?notif_id=1567457425119728¬if_t

This letter is being publicly published just in case any on the council do not want to take their duties seriously, then you can answer to your constituents. However, they are already not happy at the waste of their tax-dollars and the abuse of authority that is being perpetrated in your name and/or under your supervision.

I hope to hear from you soon that these allegations are being investigated and that you will make certain no election shenanigans take place whether they be unlawful or simply a conflict-of-interest. The residents of the City are expecting you to hold any who have violated law or policy accountable.

Because remember you tell your constituents that you built the \$24 million dollar City Hall because you glorify democracy. Now is your chance to show you are not a hypocrite that should be thrown out of office with a recall petition, by stopping the subversion of our democratic processes by your employees.

Sincerely,

Dr. James Eric McDonough
